

## DC Calibration Resistor CY-KW10

CY-KW10 is DC calibration resistor, which is designed and made according to the Standard JB/T8225-1999 for DC resistors used in laboratory and electrical engineering. By using full closed structure and automatic temperature control it ensures resistor good long-term stability and small temperature coefficient. This DC resistor is very suitable for DC current measurement and calibration of current measuring systems and current sensors. The maximal measuring current is 10A with measuring accuracy of  $\pm 0.01\%$
