DC Current Sensor CYCT04-LTAD

This current sensor series is based on magnetic modulation principle and has good stability for measuring 1A~100A DC current and high isolation between primary current and secondary output signal. This sensor can be used for measurement of DC currents.

**Product Characteristics**
- Excellent accuracy
- Very good linearity
- Less power consumption
- Window structure
- Electrically isolating the output of the transducer from the current carrying conductor
- No insertion loss
- Current overload capability

**Applications**
- Various power supply
- Communication systems
- Leakage current measurement
- Numerical controlled machine tools
- Current difference measurement
- Electric circuits measurement
- Microcomputer monitoring
- Electric power network monitoring

**Electrical Data**

The primary nominal current can be selected between 1A and 100A DC.

Supply Voltage $V_{cc}$ = ±15V ± 5%
Current Consumption $I_c < 20mA$
Galvanic Isolation, 50/60Hz, 1min: $5.0kV$
Isolation resistance @ 500 VDC > 500 MΩ

**Accuracy and Dynamic performance data**
- Accuracy at $I_r$, $T_A=25°C$ (without offset), $X <±0.5%$
- Linearity from 0 to $I_r$, $T_A=25°C$, $E_L <0.2%$ FS
- Electric Offset Voltage, $T_A=25°C$, $V_{oe}<±10mV$
- Thermal Drift of Offset Voltage, $V_{ot}<±0.5mV/^\circ C$
- Response Time at 90% of $I_p$ ($f=1k$ Hz), $t_r < 20ms$
General Data
Ambient Operating Temperature,
Ambient Storage Temperature,

$T_A = -40^\circ C \sim +85^\circ C$

$T_S = -40^\circ C \sim +125^\circ C$

PIN Definition and Dimensions

Notes:
1. Connect the terminals of power source, outputs respectively and correctly, never make wrong connection.
2. Two potentiometers can be adjusted, only if necessary, by turning slowly to the required accuracy with a small screwdriver.
3. The best accuracy can be achieved when the window is fully filled with primary cable (current carrying conductor).
4. The in-phase output can be obtained when the direction of current of current carrying conductor is the same as the direction of arrow marked on the transducer.
